

WE COUNT

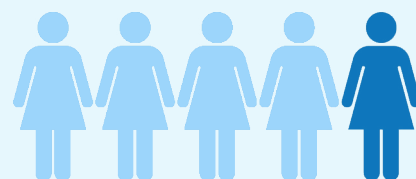

MEASURING THE HUMAN TOLL
OF INCONTINENCE

Incontinence isn't just a physical challenge - it can be financially debilitating, as well.

Incontinence
can cost
**\$900 -
\$4,000**
per year

More than half of patients
spends \$50 or more per
month on absorbent
products alone.

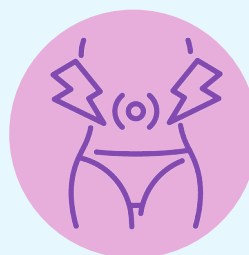

Nearly 1 in 5 patients
spends \$100+ per
month to manage their
incontinence

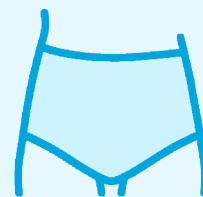

For 1 in 3 patients,
absorbent products make
up as much as 60% of
their monthly budget.

70% of patients choose
absorbents over food or
medicine when forced to
choose

Nearly 1/4 of women
miss work because of
incontinence

Medicare typically does
NOT cover pads, adult
diapers or disposable
underwear

When it comes to incontinence, numbers are important, especially where your wallet is concerned. Learn more about ways you can cut the cost by visiting us today:
